SUMMARY

Results-driven **Engineer** with expertise in **scalable web applications**, **cloud-native solutions**, and **automation** for global organizations. Skilled in **backend development**, **distributed systems**, **microservices**, **RESTful APIs**, and **platform architecture**. Proficient in **full-stack development** across frontend/backend, cloud platforms (**AWS**, **Azure**), databases (**PostgreSQL**, **MySQL**), and modern **DevOps practices** including **CI/CD**, **Docker**, and **Kubernetes**. Adept at **system design**, **performance optimization**, and delivering high impact and maintainable solutions.

EXPERIENCE

British Petroleum

June 2023 – Present

Software Engineer

Pune, India

- Designed and implemented a centralized Localization Service(.NET, Contentful) with TypeScript and .NET clients, enabling seamless multi-language support and reducing implementation effort by 60% across products.
- Built a scalable Audit Trail Service for consistent, reliable microservice event tracking using .NET and Kafka.
- Developed reusable CI/CD pipelines in Azure DevOps for .NET monorepos: automated build/test, GraphQL change detection, Docker image creation, and Helm-based Kubernetes deployment.
- Engineered in-memory Kafka + Debezium simulator, improving integration test stability and CI speed by 50%.
- Developed and maintained shared .NET libraries and internal tooling for domain teams.

Amazon

Dec. 2020 – May 2023

Software Development Engineer

Hyderabad, India

- Architected and implemented Amazon Legal Entity Explorer, an internal tool supporting thousands of tax filers in entity data search and analysis.
- Built real-time data monitoring apps for associate-labeled Alexa utterances, enabling labeling decisions within 6 seconds of ingestion.
- Designed and developed Schedule Manager, a multitenant solution for managing schedules of 20,000+ global associates, optimizing workforce utilization, and reducing annotation downtime.
- Developed scalable monitoring for database activity using DB logs, AWS Kinesis, and Athena, enabling time-series analysis and cutting issue investigation time by over 60%.

Barclays

July. 2018 – Dec 2020

Software Engineer

Pune, India

- Designed and built a high-performance Email Notification Engine, decommissioning legacy Windows systems, cutting infrastructure costs, and improving maintainability.
- Led migration of critical applications to AWS, ensuring high availability, scalability, and cost-efficiency through well-architected cloud solutions.

EDUCATION

Visvesvaraya National Institute Of Technology

Nagpur

2014 – 2018

Courses: Database Management Systems, Operating Systems, Data Structures and Program Design, Computer Networks, Object Oriented Programming

Certifications: AWS Solutions Architect - Associate, AWS Developer - Associate

SKILLS

Technologies & Tools: Java, Python, JavaScript, TypeScript, C#, React.js, Vue.js, HTML, CSS, Bootstrap, Responsive Design, UI/UX, Node.js, Django, .NET, RESTful APIs, GraphQL, Microservices, Server-side Development, PostgreSQL, MySQL, MongoDB, SQL, NoSQL, Database Design, ORM, AWS, Azure, Docker, Kubernetes, CI/CD, Jenkins, Azure DevOps, Cloud Migrations, Containerization, Grafana, Kafka, Git, Agile, Unit Testing, Integration Testing, Debugging, API Design, OAuth, Security Best Practices, High Level Design (HLD), Low Level Design (LLD), System Design, Architecture, Software Development Lifecycle (SDLC), Object-Oriented Programming (OOP), Design Patterns, Troubleshooting, Performance Optimization, Scalability, Automation, Refactoring.

Familiar: MySQL, .NET, React
